

GRIDSITE™

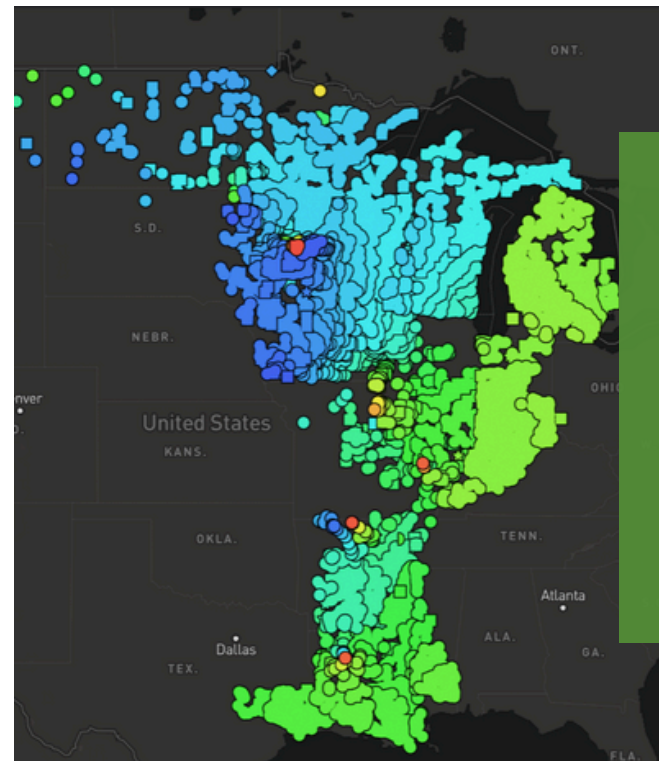

Maximize the Potential of Your Energy Projects

GRIDSITE BENEFITS

- Historical and forecast pricing data for over 100,000 price nodes in conjunction with the most comprehensive market data to explain price movements.
- Tracking 50,000 generation, 55,000 transmission, and 6,000 load center projects from over 2,000 sources by a team of 10 analysts.
- Over 3 billion rows of power transactions mapped to thousands of plants to help you understand how market participants are structuring contracts and operating assets.

GridSite™ empowers companies across the electric power industry with market information to make better decisions around asset siting and offtake agreements. Whether you're developing energy assets, negotiating a PPA, or undertaking long term planning studies, GridSite delivers the critical data and analysis needed to understand the pricing and revenue potential of your projects across all ISO regions.

GridSite offers a comprehensive view of historical and forecasted nodal prices, insight into market conditions that drive these prices, an understanding of upcoming changes to generation, transmission, and load center infrastructure, and the ability to benchmark your assets against existing operational assets.

DATA INSIGHTS THAT POWER YOUR BUSINESS

FEATURE	DESCRIPTION
Long Term LMP Forecast	Long term bankable hourly level nodal LMP forecast out to 2050. Includes 100,000 price nodes along with assumptions on generation build out, load growth, emissions, and fuel prices.
Historic LMPs and Drivers	Analytical tools and maps to understand historic pricing (LMPs, basis, production weighted pricing) and drivers of pricing including load, generation, and congestion.
Queue Data	Tool leveraging ISO interconnection queues, and hundreds of other sources to understand upcoming changes to power infrastructure including upcoming generation, transmission, and load centers.
Plant Benchmarking	Tool leveraging EQR data to understand operations and revenue of existing assets for benchmarking purposes.

ABOUT YES ENERGY®

Yes Energy is how traders, power companies, and asset managers and developers can finally make sense of the complex, rapidly changing power market.

Supported by best-in-industry customer support, you get up-to-date data, comprehensive tools, and a specialized partner to help you make the right decisions every day.

It's time to Win the Day Ahead™ and only Yes Energy brings you the unique combination of better data, better delivery, and better direction you need to do that.

"Since integrating GridSite into my workflow, my approach to generation asset valuation has completely transformed. By consolidating critical datasets from multiple sources into one user-friendly platform, GridSite has drastically reduced the time I spend gathering and processing information. The clarity, accuracy, and finger-tip availability of power market data empowers me to deliver more robust, actionable insights to my clients by bridging the gap between pre-development and operational revenue expectations. As a result, our asset valuations are more resilient to market changes and are grounded in a deeper understanding of both current market conditions and future drivers of value and risk. With GridSite, I have a trusted ally in navigating the ever evolving complexities of today's power markets."
